– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. Applicant's election without traverse of the species readable on claims 10-12, 15, 16 and 19 in the reply filed on 11/3/2005 is acknowledged. However, applicant was advised to select one of the species identified as the six "embodiments" in the brief description of the drawings. It is assumed that applicant elected the species of Fig. 10 or 11 or to an embodiment corresponding thereto. Claim 15 does not correspond to any of these species because the pressing member is arranged to press the vibrator and not the driven body as in Figs. 10-11. Consequently, this claim is not considered readable on the elected species.
2. Claims 13-15, 17-18, and 20-21 are withdrawn from consideration as not directed to the elected species.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "fifth embodiment" described at page 23, lines 2-13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 10-12, 16 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by the U.S. Patent to Miyazawa et al (6885615).
4. The reference discloses an analog timepiece comprising a plate like vibrator 10, a driven body 100 driven by vibration of vibrator 10, time indicating mechanism 72 moved by the driven body via transform mechanism 556, the vibrator including piezoelectric actuator defined by a diaphragm formed by stacking piezoelectric elements 30,31 and a plate like reinforcing member 32, fixing portion 552 adapted to fix the diaphragm to supporting body 103, abutment portion 36 disposed at the longitudinal end of the diaphragm, the piezoelectric element vibrating in a longitudinal direction and at an angle with respect to the longitudinal direction (see col. 14, lines 42ff), abutment portion 36 moving to drive driven body 100, the latter being pressed into engagement

with abutment portion 36 by pressing member 550 (Fig. 53), vibrator 10 not overlapping the driven body 100 or transform mechanism 556(see Figs. 1 and 53), pressing member 550 pressing driven body 100 (Fig. 53).
